

Zaid Budihal

ABOUT ME

Software Developer
Full Stack Engineer

Software Developer with more than 2 years of hands-on experience designing, developing and implementing applications and solutions using a range of technologies and programming languages. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Developer.

WORK HISTORY

Software Developer

WIZZWIN [January 2022 to Present]

Developing and implementing new strategies and architecture and also contributing in designing.

Management of web applications and database administration after development, fixing and finding better solutions and enhancing performance of products.

- Connecting databases on applications and development of it in environments such as **MongoDB** and **NodeJS**. Making custom hooks in **React** for simpler coding. Experience in file system libraries from **Node**, utilizing it for precise data reporting.
- Deployment of applications on **AWS** instances such as EC2 instance. Configuring and implementing **NGINX** to create a web server for applications.
- Utilizing different libraries for styling and well organized interfaces such as **ChakraUI** and **TailwindCSS**.
- Recognizing various obstacles by testing and implementing new solutions with tools such as Jest for better development.
- Familiarity in developing tools and services related to **Amazon APIs** (SP API, Amazon Ads API). Experience in developing custom and user-friendly dashboards for clients as per their requirement.
- Experience in developing and implementing payment gateways such as **Stripe**, **OpenMoney** for e-commerce projects. Developing e-commerce product listings and landing pages.
- Experience in development in **ArcXP** and familiar with various git strategies to help in development.
- Experience in using React Typescript to write formal and robust code.
- Using and adapting different logic to suit the development and also coming up with new logic for newer problems.

Software Engineer

Cubosquare [October 2020 to October 2021]

Partaking in Web Designing and contribution to software management and applications.

Finding Solutions for prior problems and new ideas for betterment of the application.

- Skills used over the experience were React and Node JS applications.
- Working with REST APIs.
- Data Base management over MongoDB.
- Writing queries for MySQL Database.
- Troubleshooting and finding fixes and new solutions.
- Fixing bugs, debugging and resolving issues.

SKILLS

Web design

MERN

JavaScript

React JS

Angular

Node JS

AWS

MySQL

EDUCATIONAL BACKGROUND

Diploma in Computer Science

Department of Technical Education

R.N Shetty Polytechnic

2017-2020

PROJECTS

Quiz App

An online quiz competition app made on MERN Stack and deployed on AWS.

Shoppie

An E-Commerce website made using ReactJS and firebase.

Employee Management System

Employee Management System using Angular and Spring Boot

Brain Tumor Detection Model

An AI model to detect tumors from images using Convolutional Neural Networks.

ShoeMart

An Android application for shopping of footwear and accessories made in Flutter and Firebase
